PROFESSIONAL SUMMARY

Artificial Intelligence graduate and AI Engineer with hands-on experience in machine learning, deep learning, computer vision, NLP, and agentic AI systems. Experienced in building, evaluating, and deploying end-to-end AI models into production and RESTful AI services using modern frameworks. Passionate about developing scalable, real-world AI products with a measurable impact.

SKILLS

Languages: Python, C++, Java, SQL
AI Concepts: Machine Learning, Deep Learning, Computer Vision, NLP, LLMs, RAG
Libraries/Frameworks/Tools: PyTorch, TensorFlow, Scikit-learn, OpenCV, Hugging Face, LangGraph, NumPy, Pandas, FastAPI, Docker, Matplotlib, Seaborn, Power BI, Jupyter Notebook

EDUCATION

Bachelor of Computers and Artificial Intelligence | AI major
Helwan University, Egypt | 2021 - 2025
GPA 3.56/4.0 (Excellent)

PROFESSIONAL EXPERIENCES

AI Computer Vision Trainee | National Telecommunications Institute - Digital Egypt Youth, Cairo | Jul 2025 – Oct 2025

- Executed 288+ hours of AI and computer vision training focused on image classification, object detection, segmentation, GANs, and deployment.
- Completed **one-month On-the-Job Training (AI Intern)** at **Millennium Company** as part of the technical training track.
- Developed leadership and communication competencies through 132+ hours of targeted soft skills training.
- **Graduated with a final score of 95%**, ranking among the top performers in the scholarship program.

Data Science Intern | Rawmart, Cairo | Aug 2024 - Sept 2024

- Developed a product matching system to align Arabic customer product lists with the company's product database.
- Implemented NLP techniques such as tokenization, stemming, and similarity scoring.
- Evaluated and optimized matching accuracy using precision, recall, and F1-score.

Data Science Intern | CodeClause (Remote) | May 2024 - Aug 2024

- Cleaned, analyzed, and visualized large datasets for actionable insights.
- Implemented machine learning algorithms for predictive modeling.
- Built interactive visualizations with Pandas, NumPy, and Matplotlib.

Robotics and Programming Instructor | StemZone, Cairo | Dec 2023 - Feb 2024

- Instructed Grades 1 and 2 students in robotics and programming fundamentals.
 - Translated technical concepts into engaging lessons.
-

PROJECTS

PolySumm: Multimodal-RAG for Scientific Paper Summarization [link](#)

- Developed a multimodal scientific paper summarization system utilizing Retrieval-Augmented Generation (RAG) to address the challenge of information overload in scientific literature.
- Engineered a robust pipeline integrating PaddleOCR for multimodal data extraction (text, figures, tables) and specialized summarization models (transformer-based for text, vision-language for figures, table-to-text for tabular data).
- Implemented and evaluated two RAG pipelines, with the custom-built system demonstrating superior accuracy, efficiency, and comprehensive integration of diverse data modalities, significantly enhancing knowledge acquisition from complex scientific documents.

Technologies: Python, PyTorch, Hugging Face, React, Docker, Azure, FastAPI

Hekaya: AI-Powered Interactive Storytelling [link](#)

- Developed an interactive storytelling platform transforming user prompts into animated stories.
- Integrated an LLM for story generation, a TTS engine for natural narration, and LatentSync for precise lip-syncing on animated characters.
- Designed a streamlined pipeline enabling seamless conversion from text prompts to synchronized storytelling videos.

Technologies: Python, Streamlit, SQLite, LatentSync, Hugging Face, TTS, LangGraph

AD Posts Agent: Agentic AI Content Generation Platform [link](#)

- Built an AI-powered product that generates complete advertising posts (copy + visuals) from user prompt.
- Designed an agent-based workflow to automate content planning, copywriting, and visual generation for social media platforms.

Technologies: Python, FastAPI, LangGraph

COURSES

DevOps Engineer Program | Digital Egypt Pioneers Program - Cairo| Jun 2025 – Dec 2025

- Learned core DevOps concepts including Linux fundamentals, Docker, Kubernetes, Cloud computing, CI/CD with Jenkins, monitoring with Grafana, and Prometheus.

AI Training Program | National Telecommunications Institute – Huawei, Cairo | Aug 2024 - Sep 2024

- Completed an 80-hour program with a perfect score of 100%.

Data Science | Dotpy, Cairo | Nov 2023 - Feb 2024

- Completed a 75-hour training program in data science fundamentals.
 - Learned Python, SQL, data analysis using Tableau, machine learning, deep learning, and NLP.
-
